ASCS official explains need for acreage reports - The Agricultural Stabilization and Conservation Service (ASCS) has asked farmers to report 1977 wheat and feed grain acreages. Acting ASCS Administrator Victor A. Senechal, explained the reason for this requst and the significance of the report.

Under proposed farm legislation, reported by Senate and House Agriculture Committees, and effective for 1978 and succeeding crop years, the Secretary would have authority to require a set-aside of cropland as a condition of eligibility for program benefits, if the supply situation for a program crop warrants it. "In the event a set-aside is deemed necessary for any program crop in 1978, the proposed bills provide that the amount of set-aside may be based upon either 1978 or 1977 plantings," Senechal said. "Because of these alternatives, it is important that farmers who are interested in participating in future programs voluntarily report their acreages, so that the Secretary of Agriculture would have both options available if a set-aside decision is made," he explained.

However, farmers are urged not to plant additional program crop acreage this year solely in anticipaiton of additional benefits which may be gained under proposed legislation in 1978 and subsequent years. Under both farm bills, 1977 crop acreages would have no effect on the 1978 program acreages eligible for target price guarantees and disaster program protection.

The ASCS official pointed out that the acreage report is not a precedent because in prior years crop acreages have been reported which had no effect on program participation. Farmers have been reporting acreages of upland cotton, peanuts, rice, and tobacco.

"We're encouraging a voluntary response to also obtain acreages involving wheat, corn, grain sorghum, and barley."

The deadline for reporting crop acreages in Appomatox County is Sept. 1. Farmers who have harvested their crops can still report the acreage as long as there is evidence of the crop in the form of residue.

"If there were a set-aside based on 1977 plantings for one of the crops in 1978 and we had no report," Senechal said, "we would have no crop acreage on which to base the set-aside, and this could hamper the farmer's ability to participate in a program."

1977 Low Yield on Grain Crops - Producers in the county are reminded that if their planted grains have been affected by adverse weather conditions they should stop by the ASCS office or call the office to inquire about our low yield disaster payment provisions. Please check with us before doing anything to the crop.

Beef Referendum - Registered producers are reminded that Friday, July 15 is the final day for voting on the proposed Beef Research and Information Order.

SMALL BUSINESS PENSION PLAN

Mr. Small Businessman: What are you going to do about the fellow who works for you until he becomes too old to do his job properly? You have exactly three choices, no more and no less. One, you can fire him. Two, you can leave him on the payroll, or three, you can provide him with a pension.

The third way, the properly designed pension plan, has all of the advantages. The cost of retirement has been paid and considered part of the payroll while the worker is actually producing. There is no sudden cost of retirement. Morale remains high. The retirement policy is well known. There are no ticklish personnel questions as to when a man is going to retire or how much income he will receive.

To encourage pension and profit-sharing plans, the IRS also allows owners or stockholder-employees to participate; any income earned from the fund are received without current taxation and contributions made by an employer to a pension plan are tax deductible.

This information has been brought to you as a public service by SCOTT INSURANCE, Bryant & Branch Building on Route 460, Appomattox. Phone: 352-7443. See Ann Reynolds.

GREEN BEANS

Select beans with a fresh, bright appearance with good color for the variety. Get young, tender beans with pods in a firm, crisp condition.

Avoid wilted or flabby bean pods, serious blemishes, and dreggy. Thick, tough, fibrous pods indicate overmaturity.

A bushel of snap beans weighs about 30 pounds and will yield 18 to 20 quarts of canned or frozen beans.

Wash beans and drain. Cut or break off ends; cut or break into 1 or 2-inch pieces. Slice lengthwise for french-style beans.

CANNING BEANS

Raw Pack - Pack raw beans tightly to ½ inch to top. Add ½ teaspoon salt to pint jars; 1 teaspoon to quarts. Cover with boiling water, leaving ½-inch headspace. Remove air bubbles by running spatula or knife between food and jar. Adjust jar lids.

Process in pressure canner at 10 pounds pressure (240°F).

Pint jars - 20 minutes

Quart jars - 25 minutes

Hot Pack - Cover cut beans with boiling water and cook for 5 minutes. Pack hot beans loosely to ½ inch of top of jar. Add ½ teaspoon salt to pint jars; 1 teaspoon to quarts. Cover with boiling-hot liquid, leaving ½-inch headspace. Adjust jar lids.

Process in pressure canner at 10 pounds pressure (240°F.)

Pint jars - 20 minutes

Quart jars - 25 minutes

String Beans and low acid vegetables should definitely be processed under pressure.

FREEZING BEANS

Heat beans in boiling water for 3 minutes in a blancher or in a wire basket in a large kettle. Work with small quantities of beans for best results. Use at least 1 gallon of boiling water for each pound of prepared beans. Put beans in blanching basket or wire basket and lower into the boiling water (60°F. or below) to stop the cooking. Allow 5 minutes for cooling.

Drain thoroughly. Pack beans, leaving ½ inch headspace.

Seal. Freeze; at 0°F. or below.

Should you have a good preservation question or problem, call the Appomattox County Extension Office (352-8244). It is always a pleasure to help you.

RECIPE OF THE WEEK
Country Tearoom Pastry

4 cups sifted flour
1 tbsp. sugar
1½ tsp. salt
1½ cup lard
1 egg
1 tbsp. vinegar
½ cup cold water

Gas Grill To Be Given Away

Backyard barbeques are almost as much a part of America as Mom and apple pie. The Appomattox Junior Woman's Club is giving away a gas grill, shown in photo above with club members Debbie Williams and Linda Jo Mays, which will surely aid some mother as she prepares those family meals we enjoy outdoors.

The grill is made of cast aluminum and has 235 square inches of cooking surface. That's a lot of hamburgers!

Tickets for this may be obtained from any member of the Junior Woman's Club or by calling 352-5509 or 352-8104. A donation of one dollar ($1.00) buys three (3) tickets for the grill.

Club members will be at Triangle Plaza Shopping Center on Friday, July 15, and on Saturday, July 16. The drawing will be held at the Plaza on July 16th at 4 p.m. You do not have to be present to win. Get your tickets now !
